Playing with balloons becomes an opportunity to discover the amazing properties of air, but not only ... with balloons things can happen to hair-raising!

## OUTSIDE AREA SEA SIDE

9:00am | 11:00am | 2:00pm • Path scooters

Everyone can try their hand on a special track for "challenge", with their own bike or scooter laws of physics and discover their gifts of balance and its agility.

10.00am | 12:30pm • Bike Path

Everyone can try their hand on a special track for "challenge", with their own bike or scooter laws of physics and discover their gifts of balance and its agility.

11.30am • Egg Hunt

A special treasure hunt! Explore the exhibits, gardens and secret places of Science City in search of the eggs of dinosaurs. A game to stimulate the discovery, cooperation and active participation of children.

## PUPPIES AND EGGS OF THE DINOSAURS

12.00am | 1:30pm • Life in a drop of water

In a drop of water you can find dozens and dozens of microscopic living beings, animals and plants, among which there are considerable differences, most of those found, for example, between moss and oak or between a fish and a mammal. After removing a sample of water in the pond of Science City will observe with the microscope all there is to discover.

## BIC GALLERY

11.00am | 2:00pm • Journey into the nanoworld

A beautiful journey of discovery of nanotechnology. What are? What are the applications that we use every day without knowing it? Experiments with fun for children and adults will play with magic sand, the buckyball, waterproof fabrics in shape memory materials.

## Galilei 104 · THEATRE LE NUVOLE

11.00am | 12:30pm • Science Show

The air is light stuff that turns you around the head and becomes clearer when you laugh - Tonino Guerra. Turn candles, inflate balloons, shoot potatoes, ruffle the audience and communicate with smoke signals ... all this and more thanks to improbable jugglers air.
